MC-325B Semi-automatic pipe cutting machine

COMPANY PROFILE

Zhangjiagang city Cedar Technology Co., Ltd. is located in Zhangjiagang, an emerging port industrial city at the junction of the two major economic development belts along the coast and the Yangtze River. It is a new enterprise integrating industrial automation system development and production, non-standard automation product research and development, production and sales services.

We company's main products: semi-automatic pipe cutting machine, automatic pipe cutting machine, servo automatic pipe cutting machine production line: single-head chamfering machine, double-head chamfering machine, servo double-head chamfering machine, cutting chamfering production line; semi-automatic aluminum profile Cutting machine, automatic aluminum profile cutting machine; single-head hydraulic pipe bender, double-head pipe bender, servo fully automatic pipe bender: pipe end forming machine and other pipe processing equipment; meanwhile, the company can install and install on-site according to users' use.

Need to design and manufacture the above-mentioned equipment with special specifications, and various non-standard mechanical products.

The company's products are used in the processing of metal pipe products in automobiles, air conditioners, motorcycles, electric vehicles, bicycles, sports fitness equipment, steel pipe furniture, tourism and leisure products, plumbing and sanitary ware industries, and provide efficient machinery and equipment.

The products are sold in large quantities in domestic and foreign markets and exported to more than 60 countries and regions (Germany, Brazil, India, Indonesia, Malaysia, Vietnam, United Arab Emirates, Russia and the United States etc. Southeast Asia, South America, Africa ， Europe wait region

Quality: We always believe that good quality can speak, and only high-quality products are fundamental to the survival of an enterprise;

Technology: Facing the ever-changing sea of business, only continuous learning and innovation is the way to survive for an

enterprise;

Service: Understand customer needs and meet customer needs. We do not just machines, but also customized machines. Your satisfaction is our constant pursuit!

Entrepreneurial spirit: the market is the direction of the enterprise, and quality is the life of the enterprise. Without hard sweat, there will be no tears of success. Only through continuous learning can we keep pace with the times and be invincible.

Enterprise mission: make equipment, serve the society, and let more customers create greater value.

Service tenet: integrity first, efficiency first, customer first, service first.

MC - 325 - B metal circular saw machine, it is a kind of semi-automatic cutting machine, the company is on the introduction of foreign technology to innovation and development of new

products, product performance up to the same industry advanced level, can cutting all kinds of cross section shape of ordinary steel, stainless steel, copper, aluminum and other metal profiles, especially in cutting all kinds of pipe is most ideal. Only when the cutting work in and out of the material, the work clamping, loosen the finished, feed, and cutting back knife automatically by electric, pneumatic control, high efficiency, suitable for 24 hours of continuous operation. It is more durable and suitable for cutting thick pipe than normal pneumatic cutter.

The machine feature：

1.Reasonable price and convenient operation;

2.Unique gasoline conversion unit for continuous work;

3.Small noise, no dust pollution, smooth incision, no burrs.

4.The cutting angle can be adjusted freely between 45 degrees and 135 degrees, and the slits are perfectly stitched.

5.The machine is small in size, the position of the workpiece is unchanged when the angle is cut, and the space is small..

6.Intermediate fixed saw blade screw is M16 tooth, saw blade fixed more firmly, vertical degree is higher.

7.The clamp on the side is fixed on the platform, the grip is more stable, the cutting does not vibrate.

8.Structure increase to 325, and the nose structure force more than 315 model, more suitable for cutting

thick wall pipe inside 9.The nose copper worm gear twice than 315 model, drive more steady, can adjust the tightness of the bearing.

MC-325B Semi-automatic pipe cutting machine parameter

project	Unit	MC-325B	
Saw blade Angle	°	90°	45°
	mm	Φ100	Φ80
	mm	80*80	60*60
	mm	80*80	60*60
	mm	90*60	60*60
	mm	40	30
	mm	40*40	30*30

The host power	KW	2.4/3.0
Spindle speed	RPM	120/60r/min
Cooling water pump	W	40
The compressed air	Mpa	0.5-0.8
Machine Weight	KG	320
Machine size	mm	1180*650*1490(mm)
Apply saw blade ø	mm	250/275/300/315/350

MC-325B Pneumatic unilateral clamp metal circular saw machine（The inner surface is a fixed face, tighter and tighter, more suitable for cutting thick wall tubes）

After-sales service:

1.Warranty period: We guarantee machine quality for one year, during this year, if spare parts of the machine were damaged, we can send the component to the customer by DHL, TNT freely.

2.Our factory can send our engineer to the customer’s factory install, commission and training freely. The customer provide the double trip tickets, food and accommodation for our engineer. The customer also can send the engineer to our factory to learn the operation and maintains freely.

3.Our factory provide the service for the customer forever, if the

customer need operation help, can contact us by Skype,Whatsapp,WeChat, Email and Telephone at any time, we provide 24 hours on-line service.
